Proyecto

Metodología ágil

- Similar a Scrum
- Sprints de dos semanas
- Reuniones

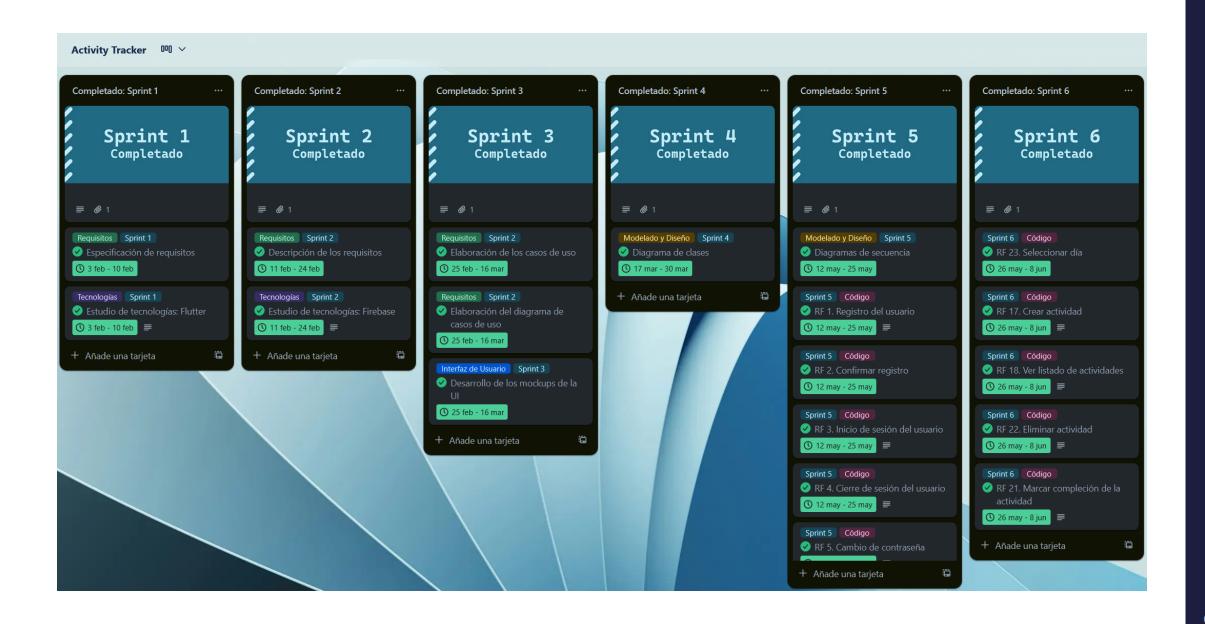

Planificación

Análisis y especificación de requisitos

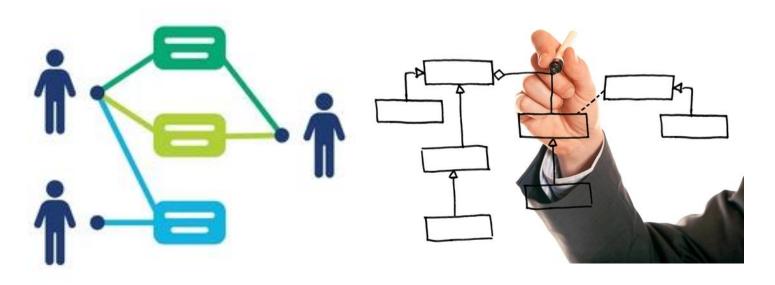

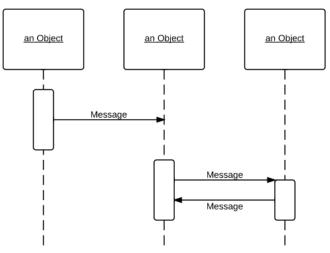

Modelado y diseño del sistema

Casos de uso Modelado estructural

Modelado comportamental

Casos de uso

ID	CU-9
Título	Ver red de amistades
Descripción	El usuario podrá ver un listado con los usuarios que ha añadido a su red
	de amistades, mostrando para cada amigo su foto de perfil, nombre de
	usuario y apodo junto a tres botones: enviar mensaje, mandar desafío y
	eliminar amigo.
Precondición	El usuario ha iniciado sesión.
	El usuario tiene el menú lateral abierto.
	El usuario tiene al menos un amigo añadido.
Postcondición	El usuario ve su red de amistades.

Escenario principal

- 1. El usuario pulsa el botón "Amigos".
- 2. El sistema muestra el listado de amigos del usuario.
- 3. El usuario ve su listado de amigos.

Pruebas unitarias

- ✓ ✓ Prueba realizada en 27/8/2025, 20:28:14
 - (setUpAll) test\activity_service_test.dart
 - Create a new custom activity ActivityService < test\activity_service_test.dart</p>
 - ✓ Get all the activities of the user ActivityService < test\activity_service_test.dart
 </p>
 - ✓ Get all the activities created by the user ActivityService < test\activity_service_test.dart
 </p>
 - ✓ Get all the template activities ActivityService < test\activity_service_test.dart
 </p>
 - Get an activity by its ID ActivityService < test\activity_service_test.dart
 - Get an activity by its ID for an activity that does not exist ActivityService < test\activity_service_test.dart</p>
 - Update an activity ActivityService < test\activity_service_test.dart</p>
 - ✓ Delete an activity by its ID ActivityService < test\activity_service_test.dart</p>
 - ✓ Deletes all the activities of the user ActivityService < test\activity_service_test.dart</p>

Pruebas de usuarios

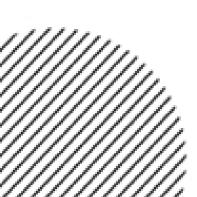

Conclusiones

- Expectativas
- Objetivos
- Conocimientos aplicados
- Retos superados
